DATE MAILED: 07/14/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/868,698	ZORBA ET AL.	
	Examiner	Art Unit	
	Mai T. Tran	2129	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 April 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

REMARKS

Applicants' amendment dated April 25, 2006 responding to the December 29, 2005 Office Action provided in the rejection of claims 1-20, wherein claims 1, 10, and 19 have been amended. Claims 1-20 remain pending in the application and which have been fully considered by the examiner.

INFORMATION DISCLOSURE STATEMENT

The information disclosure statement filed **April 25, 2006** fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Page 1 of 8: Applicants listed two U. S Patents: 4,874,784 and 4,981,766. Both do not have the correct date and/or inventors' name. The Examiner does not know which U. S. Patent applicants intended to list.

CLAIM REJECTIONS - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 10, and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants recite new limitation “a determined feedback having a feedback category” in the above claims. Applicants also refer to the specification on page 16, lines 5-9 (emphasis added):

“Focusing on the educational components of completing a task is not enough. As any teacher knows, student will often try and cheat their way through a task. Students may do no work and hope the teacher does not notice or the student may only do minor changes in hope of a hint or part of the answer. To accommodate these administrative functions, **there are three additional administrative categories of feedback. The administrative and the educational categories of feedback** account for every piece of feedback a designer can write and a student can receive.”

Examiner wonders which category of feedback applicants are claiming? Is it administrative category or educational or both? In the case applicants are claiming administrative category then which one since the specification discloses there are three additional administrative of feedback. What exactly are they?

CLAIM REJECTIONS - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Loftin et al, U. S. Patent No. 5,311,422, hereinafter Loftin, and further in view of "Accounting and Financial Fundamentals for Non Financial Executives" by Robert Rachlin et al, hereinafter Rachlin.

Claim 1

Loftin discloses an intelligent computer-aided training system for use in a wide variety of training tasks and environments,

a method for creating a presentation, comprising the steps of:

Art Unit: 2129

- (a) receiving an accounting goal (col. 6, lines 46-52);
- (b) partitioning feedback into a plurality of feedback levels, each feedback level corresponding to a severity level of a response error, the feedback being associated with the accounting goal (col. 13, lines 54-68, col. 14, lines 1-18. Examiner interprets *appropriate error messages* as plurality of feedback levels);
- (c) querying a student to determine characteristics of the student (col. 14, lines 48-61);
- (d) integrating information based on the characteristics of the student that motivates accomplishment of the accounting goal (col. 16, lines 23-25);
- (e) evaluating progress toward the goal (col. 6, lines 55-59) and providing a determined feedback having a feedback category (col. 12, lines 57-65, col. 14, lines 5-6. Examiner interprets *diagnose the nature of the error*, and *sensitive to the skill level of the trainee* as feedback category) based on an appropriate level of feedback (col. 14, lines 8-9) and an appropriate training component (col. 16, lines 31-43) that further motivates accomplishment of the accounting goal (col. 6, lines 55-59), the appropriate level of feedback being selected from the plurality of feedback levels based on an error severity of an associated response from the student (col. 14, lines 8-16), the appropriate training component being selected from a plurality of training components and based on an amount of work contained in the associated response (col. 16, lines 31-43); and
- (f) dynamically adjusting a selected level of feedback based on the progress of the student toward the accounting goal (col. 14, lines 23-38).

Claim 9

Loftin discloses a method for creating an accounting goal based presentation as recited in claim 1, including the step of adjusting an example based on student progress (col. 10, lines 7-15).

Claim 10

Loftin discloses an apparatus that creates a presentation, comprising:

- (a) a processor. Official notice is taken that processor or Central Processing Unit is the brain of the computer;
- (b) a memory that stores information under the control of the processor. Official notice is taken that every computer comes with a certain amount of memory;
- (c) logic that receives an accounting goal (col. 6, lines 46-52);
- (d) logic that partitions feedback into a plurality of feedback levels, each feedback level corresponding to a severity level of a response error, the feedback being associated with the accounting goal (col. 13, lines 54-68, col. 14, lines 1-18. Examiner interprets *appropriate error messages* as plurality of feedback levels);
- (e) logic that queries a student to determine characteristics of the student (col. 14, lines 48-61) ;
- (f) logic that integrates information based on the characteristics of the student that motivates accomplishment of the accounting goal (col. 16, lines 23-25);
- (g) logic that evaluates progress toward the goal (col. 6, lines 55-59) and provides a determined feedback having a feedback category (col. 12, lines 57-65, col. 14, lines 5-6. Examiner interprets *diagnose the nature of the error*, and *sensitive to the skill level of the*

trainee as feedback category) based on an appropriate level of feedback (col. 14, lines 8-9) and an appropriate training component (col. 16, lines 31-43) that further motivates accomplishment of the accounting goal (col. 6, lines 55-59), the appropriate level of feedback being selected from the plurality of feedback levels based on an error severity of an associated response from the student (col. 14, lines 8-16), the appropriate training component being selected from a plurality of training components and based on an amount of work contained in the associated response (col. 16, lines 31-43); and

- (h) logic that dynamically adjusts a selected level of feedback based on the progress of the student toward the accounting goal (col. 14, lines 23-38).

Claim 18

Loftin discloses an apparatus that creates a presentation as recited in claim 10, including logic to adjust an example based on student progress (col. 10, lines 7-15).

Claim 19

Loftin discloses a computer-readable medium for creating a presentation and having computer-executable instructions to perform the steps comprising:

- (a) receiving an accounting goal (col. 6, lines 46-52);
- (b) partitioning feedback into a plurality of feedback levels, each feedback level corresponding to a severity level of a response error, the feedback being associated with the accounting goal (col. 13, lines 54-68, col. 14, lines 1-18. Examiner interprets *appropriate error messages* as plurality of feedback levels);
- (c) querying a student to determine characteristics of the student (col. 14, lines 48-61);

Art Unit: 2129

- (d) integrating information based on the characteristics of the student that motivates accomplishment of the accounting goal (col. 16, lines 23-25);
- (e) evaluating progress toward the goal (col. 6, lines 55-59) and providing a determined feedback having a feedback category (col. 12, lines 57-65, col. 14, lines 5-6. Examiner interprets *diagnose the nature of the error*, and *sensitive to the skill level of the trainee* as feedback category) based on an appropriate level of feedback (col. 14, lines 8-9) and an appropriate training component (col. 16, lines 31-43) that further motivates accomplishment of the accounting goal (col. 6, lines 55-59), the appropriate level of feedback being selected from the plurality of feedback levels based on an error severity of an associated response from the student (col. 14, lines 8-16), the appropriate training component being selected from a plurality of training components and based on an amount of work contained in the associated response (col. 16, lines 31-43); and
- (f) dynamically adjusting a selected level of feedback based on the progress of the student toward the accounting goal (col. 14, lines 23-38).

Claim 20

Loftin discloses the computer-readable medium of claim 19, containing further computer-executable instructions for:

- (g) monitoring answers to questions posed to evaluate the progress toward the accounting goal (col. 14, lines 35-38); and
- (h) generating individualized coaching messages that further motivate accomplishment of the accounting goal (col. 14, lines 7-9).

Loftin fails to particularly call for an accounting goal based presentation, as specified in claims 1, 10, and 19; debit processing material being integrated into a presentation, as specified in claims 2 and 11; credit processing material being integrated into a presentation, as specified in claims 3 and 12; closing material being integrated into a presentation, as specified in claims 4 and 13; ledger processing material being integrated into a presentation, as specified in claims 5 and 14; t-account processing material being integrated into a presentation, as specified in claims 6 and 15; multiple account processing material being integrated into a presentation, as specified in claims 7 and 16; and asset processing material being integrated into a presentation, as specified in claims 8 and 17.

Rachlin teaches the basic accounting and financial concepts calling for an accounting goal based presentation (page ix, line 5), as specified in claims 1, 10, and 19; debit processing material is integrated into the presentation (page 65, line 15), as specified in claims 2 and 11; credit processing material is integrated into the presentation (page 65, line 16), as specified in claims 3 and 12; closing material is integrated into the presentation (page 71, line 11), as specified in claims 4 and 13; ledger processing material is integrated into the presentation (page 70, line 11), as specified in claims 5 and 14; t-account processing material is integrated into the presentation (page 65, line 17), as specified in claims 6 and 15; multiple account processing material is integrated into the presentation, as specified in claims 7 and 16; asset processing material is integrated into the presentation (page 15, line 5), as specified in claims 8 and 17;

Regarding claim 7, Official notice is taken that accounting system comprises a plurality of accounts.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine Loftin in view of Rachlin in order to accommodate a specific need i.e., teaching accounting. Applicants have merely taken a known subject and adapted to be taught using a computer, which Loftin discloses broadly that computers can be used to teach subjects.

CONCLUSION

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

CORRESPONDENCE INFORMATION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mai T. Tran whose telephone number is (571) 272-4238. The examiner can normally be reached on M-F 9:00am-- 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Vincent can be reached on 571-272-3080. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
